

ALPACA WASH

by  **INCALPACA**

**Incalpaca has pioneered
to create the first ever machine
washable alpaca garments.**

ALPACAWASH

The process, which takes advantage of the fiber's unique characteristics,
uses eco-friendly chemicals
which results in a

durable,
sustainable
and functional product.

Unlike other Superwash materials,
ALPACAWASH uses less water and
no heavy chemicals, further increasing
**the sustainability
credentials for
Alpaca fiber.**

ALPACAWASH

Soft touch

Scales height (Mics.)

Alpaca fibre

0,25 - 0,30

Wool

0,65 - 0,90

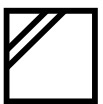

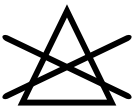

PRODUCTION PROCESS

The finished yarn goes through two different processes. First, a bath is applied with water containing between 0.5% and 1% of UNIZIM PWO, an enzyme that eliminates chemically the scales found in each hair of the fiber, by eliminating the scales, felting is prevented.

The second step is an additional bath, applying 15 to 40 grams per liter of two resins: BAP and PUR-C, which coats the strands, providing softness and preventing shrinkage.

The chemicals used in this process are supplied by the company Color Center, which certifies its products with Bluesign, Reach SVHC, ISO 14001 standard and are compatible with Oekotex Standard 100.
