

RAIN *SHIELD* STORM *SHIELD*

by  INCALPACA

RAIN *SHIELD*

Taking advantage of alpaca fiber's resilience and durability, we have created a process which transforms our fabrics into **RAIN *SHIELD***.

RAIN *SHIELD*

This treatment allows our users to face the rain and the threat of stains, **without losing style.**

PRODUCTION PROCESS	Once the fabric is finished, we apply a bath with water and 3 grams per liter of Centergard RSX, a product certified by Bluesign RSL V10.2, Reach SVHC and Oekotex Standard 100.	
	This chemical impregnates the fabric and provides water repellence.	
CARE INSTRUCTIONS	○	

RAIN SHIELD

STORM *SHIELD*

Starting from our unique **RAIN *SHIELD*** treatment, **we apply a special and microporous membrane to create our STORM *SHIELD* fabrics.**

STORM *SHIELD*

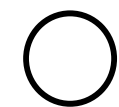

Increasing, even further,
the impermeability and windproof
conditions of our products.

STORM SHIELD

We have designed a set of **high-performance, smart, and functional fabrics** using a durable, soft, and natural raw material: **Alpaca fiber.**

PRODUCTION PROCESS	Once a RainShield fabric is produced and additional process can be applied to provide further impermeability.	
	A special membrane is applied to the hidden side of the fabric. This membrane is from the company Gore-Tex, which have a microporous structure made with polytetrafluoroethylene.
