FIBRES USED TO CREATE **OUR COLLECTION 2025**

SILK

Known for its softness, smooth texture and natural lustre. Silk is renowned for its lightness and breathability, making it comfortable in both hot and cold climates.

WOOL

A renewable and ecological fibre, made up of natural waves and curls, it is strong and durable, making the garment last longer.

BABY ALPACA

Our fibre par excellence, ideal for every season. Recognised for its multiple properties and its sustainable origin. In addition to its versatility to provide a unique finish to each piece.

BAMBOO

A highly renewable and environmentally friendly natural fibre that offers a combination of softness, breathability and sustainability, ideal for warm climates.

NYLON

Synthetic fibre with high versatility, strength, elasticity and durability, ideal for giving a comfortable structure to any garment.

FACTORY CERTIFICATIONS

WRAP certification is recognised around the world as proof of social compliance in the apparel industry. WRAP ensures that our factory operate in a safe, responsible and ethical manner.

Peru Carbon Footprint is an official tool of the Peruvian government that recognises how public and private organisations manage their greenhouse gas (GHG) emissions for the benefit of the environment.

BASC certification is designed to secure and facilitate international trade based on trust and confidence by confirming the control work carried out in all production, packing, shipping and transport processes.

Bio Trade Peru confirms that the certified company operates according to the Bio Trade model, with mechanisms for the conservation and sustainable use of biodiversity through a sustainable chain.

This certification confirms our commitment to principles such as opportunities for disadvantaged producers, transparency, fair trade practices, promotion of fair trade and respect for the environment.
