

DISCOVER OUR PROPOSAL FOR YOUR 2025 COLLECTION

ACCESSORIES CAPABILITY

TRAFORATTO

This technique creates transparency in a decorative way. It's often used to add texture, visual interest and intricate patterns to fabrics.

MULTIPLE STRUCTURE

This technique involves the simultaneous weaving of several additional yarns into the fabric structure, allowing the creation of complex patterns, textures and designs to create different vissual effects.

HAND DYED

An ancient technique of dyeing that allows the creation of a unique, colourful and limited edition pattern in each piece of clothing.

JACQUARD WEAVE

An amazing weaving technique that allows you to create an infinite number of designs in a variety of colours.

SPRING 2025 FIBRES PROPOSAL

LINEN

A sustainable and eco-friendly choice, renowned for its durability, breathability, natural lustre, distinctive texture and timeless elegance.

SILK

Known for its softness, smooth texture and natural lustre. Silk is renowned for its lightness and breathability, making it comfortable in all seasons.

BABY ALPACA

Our fibre par excellence, ideal for every season.
Recognised for its multiple properties and its sustainable origin. In addition to its versatility to provide a unique finish to each piece.

COTTON

Valued for its versatility, breathability, comfort and durability. A renewable and biodegradable resource, cotton remains a cornerstone of the textile industry.

NATIVE COTTON

With an antiquity of more than 5000 years in our country, this natural fibre makes it possible to create garments of a unique colour without the need for any type of dyeing.

FACTORY CERTIFICATIONS

WRAP certification is recognised around the world as proof of social compliance in the apparel industry. WRAP ensures that our factory operate in a safe, responsible and ethical manner.

Peru Carbon Footprint is an official tool of the Peruvian government that recognises how public and private organisations manage their greenhouse gas (GHG) emissions for the benefit of the environment.

BASC certification is designed to secure and facilitate international trade based on trust and confidence by confirming the control work carried out in all production, packing, shipping and transport processes.

Bio Trade Peru confirms
that the certified
company operates
according to the Bio
Trade model, with
mechanisms for the
conservation and
sustainable use of
biodiversity through a
sustainable chain.

This certification confirms our commitment to principles such as opportunities for disadvantaged producers, transparency, fair trade practices, promotion of fair trade and respect for the environment.

PURE A natural category, made exclusively from natural fibres in their natural colours, without any dyeing process.
